Item 4: Advisory Business

A. Description of the Advisory Firm

Infinity Investment Advisors LLC (hereinafter "INFINITY") is a Limited Liability Company organized in the State of Alabama. The firm was formed in July 2024, and the principal owner is Infinity Accounting and Tax Services, Inc.

B. Types of Advisory Services

Portfolio Management Services

INFINITY offers ongoing portfolio management services based on the individual goals, objectives, time horizon, and risk tolerance of each client. INFINITY creates an Investment Policy Statement for each client, which outlines the client's current situation (income, tax levels, and risk tolerance levels). Portfolio management services include, but are not limited to, the following:

- Investment strategy
- Asset allocation
- Risk tolerance
- Personal investment policy
- Asset selection
- Regular portfolio monitoring

INFINITY evaluates the current investments of each client with respect to their risk tolerance levels and time horizon. Risk tolerance levels are documented in the Investment Policy Statement, which is given to each client.

INFINITY seeks to provide that investment decisions are made in accordance with the fiduciary duties owed to its accounts and without consideration of INFINITY's economic, investment or other financial interests. To meet its fiduciary obligations, INFINITY attempts to avoid, among other things, investment or trading practices that systematically advantage or disadvantage certain client portfolios, and accordingly, INFINITY's policy is to seek fair and equitable allocation of investment opportunities/transactions among its clients to avoid favoring one client over another over time. It is INFINITY's policy to allocate investment opportunities and transactions it identifies as being appropriate and prudent, including initial public offerings ("IPOs") and other investment opportunities that might have a limited supply, among its clients on a fair and equitable basis over time.

Financial Planning

Financial plans and financial planning may include, but are not limited to: investment planning; life insurance; tax concerns; retirement planning; college planning; and debt/credit planning.

Selection of Other Advisers

INFINITY may direct clients to third-party investment advisers. Before selecting other advisers for clients, INFINITY will verify that all recommended advisers are properly licensed, notice filed, or exempt in the states where INFINITY is recommending the adviser to clients.

Services Limited to Specific Types of Investments

INFINITY generally limits its investment advice to mutual funds, fixed income securities, real estate funds (including REITs), insurance products including annuities, equities, hedge funds, private equity funds, ETFs (including ETFs in the gold and precious metal sectors), treasury inflation protected/inflation linked bonds, commodities, non-U.S. securities, venture capital funds and private placements. INFINITY may use other securities as well to help diversify a portfolio when applicable.

Written Acknowledgement of Fiduciary Status

When we provide investment advice to you regarding your retirement plan account or individual retirement account, we are fiduciaries within the meaning of Title I of the Employee Retirement Income Security Act and/or the Internal Revenue Code, as applicable, which are laws governing retirement accounts. The way we make money creates some conflicts with your interests, so we operate under a special rule that requires us to act in your best interest and not put our interest ahead of yours. Under this special rule's provisions, we must:

- Meet a professional standard of care when making investment recommendations (give prudent advice);
- Never put our financial interests ahead of yours when making recommendations (give loyal advice);
- Avoid misleading statements about conflicts of interest, fees, and investments;
- Follow policies and procedures designed to ensure that we give advice that is in your best interest;
- Charge no more than is reasonable for our services; and
- Give you basic information about conflicts of interest.

C. Client Tailored Services and Client Imposed Restrictions

INFINITY offers the same suite of services to all of its clients. However, specific client investment strategies and their implementation are dependent upon the client Investment Policy Statement which outlines each client's current situation (income, tax levels, and risk tolerance levels). Clients may impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs. However, if the restrictions prevent INFINITY from properly servicing the client account, or if the restrictions would require INFINITY to deviate from its standard suite of services, INFINITY reserves the right to end the relationship.

D. Wrap Fee Programs

A wrap fee program is an investment program where the investor pays one stated fee that includes management fees, transaction costs, and certain other administrative fees. INFINITY recommends Simplicity Wealth, LLC and Flexible Plan Investments which in turn manages a wrap fee program. INFINITY's direct portfolio management is not performed under a wrap fee program.

E. Assets Under Management

INFINITY has the following assets under management:

Discretionary Amounts:	Non-discretionary Amounts:	Date Calculated:
\$31,098,201	\$0	December 2024

Item 5: Fees and Compensation

A. Fee Schedule

Portfolio Management Fees

Total Assets Under Management	Annual Fees
All Assets	1.50%

INFINITY uses the value of the account as of the last business day of the billing period, after taking into account deposits and withdrawals, for purposes of determining the market value of the assets upon which the advisory fee is based.

These fees are generally negotiable and the final fee schedule will be memorialized in the client's advisory agreement. Clients may terminate the agreement without penalty for a full refund of INFINITY's fees within five business days of signing the Investment Advisory Contract. Thereafter, clients may terminate the Investment Advisory Contract generally with 30 days' written notice.

Financial Planning Fees

Fixed Fees

The negotiated fixed rate for creating client financial plans is between \$250 and \$5,000.

Hourly Fees

The negotiated hourly fee for these services is between \$150 and \$500.

Clients may terminate the agreement without penalty, for full refund of INFINITY's fees, within five business days of signing the Financial Planning Agreement. Thereafter, clients may terminate the Financial Planning Agreement generally upon written notice.

Selection of Other Advisers Fees

INFINITY may direct clients to third-party investment advisers. INFINITY will be compensated via a fee share from the advisers to which it directs those clients. The fees shared are negotiable and will not exceed any limit imposed by any regulatory agency. The notice of termination requirement and payment of fees for third-party investment advisers will depend on the specific third-party adviser selected.

INFINITY may specifically direct clients to Simplicity Wealth LLC. The annual fee schedule is as follows:

Total Assets	INFINITY's Fee	Third Party's Fee	Total Fee
All Assets	1.00%	0.41%	1.41%

INFINITY may specifically direct clients to Flexible Plan Investments. The annual fee schedule is as follows:

Total Assets	INFINITY's Fee	Third Party's Fee	Total Fee
All Assets	1.25%	0.25%	1.50%

B. Payment of Fees

Payment of Portfolio Management Fees

Asset-based portfolio management fees are withdrawn directly from the client's accounts with client's written authorization on a monthly basis. Fees are paid in arrears.

Payment of Financial Planning Fees

Financial planning fees are paid via check.

Fixed financial planning fees are paid 50% in advance, but never more than six months in advance, with the remainder due upon presentation of the plan.

Hourly financial planning fees are paid in arrears upon completion.

Payment of Selection of Other Advisers Fees

Fees are paid monthly or quarterly in arrears.

The timing, frequency, and method of paying fees for selection of third-party managers will depend on the specific third-party adviser selected and will be disclosed to the client prior to entering into a relationship with the third-party advisor.

C. Client Responsibility For Third Party Fees

Clients are responsible for the payment of all third party fees (i.e. custodian fees, brokerage fees, mutual fund fees, transaction fees, etc.). Those fees are separate and distinct from the fees and expenses charged by INFINITY. Please see Item 12 of this brochure regarding broker-dealer/custodian.

D. Prepayment of Fees

INFINITY collects certain fees in advance and certain fees in arrears, as indicated above. Refunds for fees paid in advance but not yet earned will be refunded on a prorated basis and returned within fourteen days to the client via check, or return deposit back into the client's account.

Fixed fees that are collected in advance will be refunded based on the prorated amount of work completed at the point of termination.

E. Outside Compensation For the Sale of Securities to Clients

Representatives in their outside business activities (see Item 10 below) is licensed to accept compensation for the sale of investment products to INFINITY clients. This presents a conflict of interest and gives the representatives an incentive to recommend products based on the compensation received rather than on the client's needs. When recommending the sale of securities or investment products for which the representatives receives compensation, INFINITY will document the conflict of interest in the client file and inform the client of the conflict of interest. Clients always have the right to decide whether to purchase INFINITY -recommended products and, if purchasing, have the right to purchase those products through other brokers or agents that are not affiliated with INFINITY.

Commissions are not INFINITY's primary source of compensation for advisory services. Advisory fees that are charged to clients are not reduced to offset the commissions or markups on securities or investment products recommended to clients.

Item 6: Performance-Based Fees and Side-By-Side Management

INFINITY does not accept performance-based fees or other fees based on a share of capital gains on or capital appreciation of the assets of a client.

Item 7: Types of Clients

INFINITY generally provides advisory services to the following types of clients:

- ❖ Individuals
- ❖ High-Net-Worth Individuals

There is no account minimum for any of INFINITY's services.

Item 8: Methods of Analysis, Investment Strategies, & Risk of Loss

A. Methods of Analysis and Investment Strategies

Methods of Analysis

INFINITY's methods of analysis include Charting analysis, Cyclical analysis, Fundamental analysis, Modern portfolio theory, Quantitative analysis and Technical analysis.

Charting analysis involves the use of patterns in performance charts. INFINITY uses this technique to search for patterns used to help predict favorable conditions for buying and/or selling a security.

Cyclical analysis involves the analysis of business cycles to find favorable conditions for buying and/or selling a security.

Fundamental analysis involves the analysis of financial statements, the general financial health of companies, and/or the analysis of management or competitive advantages.

Modern portfolio theory is a theory of investment that attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, each by carefully choosing the proportions of various asset.

Quantitative analysis deals with measurable factors as distinguished from qualitative considerations such as the character of management or the state of employee morale, such as the value of assets, the cost of capital, historical projections of sales, and so on.

Technical analysis involves the analysis of past market data; primarily price and volume.

Investment Strategies

INFINITY uses long term trading, short term trading, short sales, margin transactions and options trading (including covered options, uncovered options, or spreading strategies).

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

B. Material Risks Involved

Methods of Analysis

Charting analysis strategy involves using and comparing various charts to predict long and short term performance or market trends. The risk involved in using this method is that only past performance data is considered without using other methods to crosscheck data. Using charting analysis without other methods of analysis would be making the assumption that past performance will be indicative of future performance. This may not be the case.

Cyclical analysis assumes that the markets react in cyclical patterns which, once identified, can be leveraged to provide performance. The risks with this strategy are two-fold: 1) the markets do not always repeat cyclical patterns; and 2) if too many investors begin to implement this strategy, then it changes the very cycles these investors are trying to exploit.

Fundamental analysis concentrates on factors that determine a company's value and expected future earnings. This strategy would normally encourage equity purchases in stocks that are undervalued or priced below their perceived value. The risk assumed is that the market will fail to reach expectations of perceived value.

Modern portfolio theory assumes that investors are risk averse, meaning that given two portfolios that offer the same expected return, investors will prefer the less risky one. Thus, an investor will take on increased risk only if compensated by higher expected returns. Conversely, an investor who wants higher expected returns must accept more risk. The exact trade-off will be the same for all investors, but different investors will evaluate the trade-off differently based on individual risk aversion characteristics. The implication is that a rational investor will not invest in a portfolio if a second portfolio exists with a more favorable risk-expected return profile – i.e., if for that level of risk an alternative portfolio exists which has better expected returns.

Quantitative analysis Investment strategies using quantitative models may perform differently than expected as a result of, among other things, the factors used in the models,

the weight placed on each factor, changes from the factors' historical trends, and technical issues in the construction and implementation of the models.

Technical analysis attempts to predict a future stock price or direction based on market trends. The assumption is that the market follows discernible patterns and if these patterns can be identified then a prediction can be made. The risk is that markets do not always follow patterns and relying solely on this method may not take into account new patterns that emerge over time.

Investment Strategies

INFINITY's use of short sales, margin transactions and options trading generally holds greater risk, and clients should be aware that there is a material risk of loss using any of those strategies.

Long term trading is designed to capture market rates of both return and risk. Due to its nature, the long-term investment strategy can expose clients to various types of risk that will typically surface at various intervals during the time the client owns the investments. These risks include but are not limited to inflation (purchasing power) risk, interest rate risk, economic risk, market risk, and political/regulatory risk.

Margin transactions use leverage that is borrowed from a brokerage firm as collateral. When losses occur, the value of the margin account may fall below the brokerage firm's threshold thereby triggering a margin call. This may force the account holder to either allocate more funds to the account or sell assets on a shorter time frame than desired.

Options transactions involve a contract to purchase a security at a given price, not necessarily at market value, depending on the market. This strategy includes the risk that an option may expire out of the money resulting in minimal or no value, as well as the possibility of leveraged loss of trading capital due to the leveraged nature of stock options.

Short sales entail the possibility of infinite loss. An increase in the applicable securities' prices will result in a loss and, over time, the market has historically trended upward.

Short term trading risks include liquidity, economic stability, and inflation, in addition to the long term trading risks listed above. Frequent trading can affect investment performance, particularly through increased brokerage and other transaction costs and taxes.

Solicitor Services / Selection of Other Advisers: Although INFINITY will seek to select only money managers who will invest clients' assets with the highest level of integrity, INFINITY's selection process cannot ensure that money managers will perform as desired and INFINITY will have no control over the day-to-day operations of any of its selected money managers. INFINITY would not necessarily be aware of certain activities at the underlying money manager level, including without limitation a money manager's engaging in unreported risks, investment "style drift" or even regulator breach or fraud.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

C. Risks of Specific Securities Utilized

INFINITY's use of short sales, margin transactions and options trading generally holds greater risk of capital loss. Clients should be aware that there is a material risk of loss using any investment strategy. The investment types listed below (leaving aside Treasury Inflation Protected/Inflation Linked Bonds) are not guaranteed or insured by the FDIC or any other government agency.

Mutual Funds: Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment returns. The funds can be of bond "fixed income" nature (lower risk) or stock "equity" nature.

Equity investment generally refers to buying shares of stocks in return for receiving a future payment of dividends and/or capital gains if the value of the stock increases. The value of equity securities may fluctuate in response to specific situations for each company, industry conditions and the general economic environments.

Fixed income investments generally pay a return on a fixed schedule, though the amount of the payments can vary. This type of investment can include corporate and government debt securities, leveraged loans, high yield, and investment grade debt and structured products, such as mortgage and other asset-backed securities, although individual bonds may be the best known type of fixed income security. In general, the fixed income market is volatile and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk, and credit and default risks for both issuers and counterparties. The risk of default on treasury inflation protected/inflation linked bonds is dependent upon the U.S. Treasury defaulting (extremely unlikely); however, they carry a potential risk of losing share price value, albeit rather minimal. Risks of investing in foreign fixed income securities also include the general risk of non-U.S. investing described below.

Exchange Traded Funds (ETFs): An ETF is an investment fund traded on stock exchanges, similar to stocks. Investing in ETFs carries the risk of capital loss (sometimes up to a 100% loss in the case of a stock holding bankruptcy). Areas of concern include the lack of transparency in products and increasing complexity, conflicts of interest and the possibility of inadequate regulatory compliance. Risks in investing in ETFs include trading risks, liquidity and shutdown risks, risks associated with a change in authorized participants and non-participation of authorized participants, risks that trading price differs from indicative net asset value (iNAV), or price fluctuation and disassociation from the index being tracked. With regard to trading risks, regular trading adds cost to your portfolio thus counteracting the low fees that one of the typical benefits of ETFs. Additionally, regular trading to beneficially "time the market" is difficult to achieve. Even

paid fund managers struggle to do this every year, with the majority failing to beat the relevant indexes. With regard to liquidity and shutdown risks, not all ETFs have the same level of liquidity. Since ETFs are at least as liquid as their underlying assets, trading conditions are more accurately reflected in implied liquidity rather than the average daily volume of the ETF itself. Implied liquidity is a measure of what can potentially be traded in ETFs based on its underlying assets. ETFs are subject to market volatility and the risks of their underlying securities, which may include the risks associated with investing in smaller companies, foreign securities, commodities, and fixed income investments (as applicable). Foreign securities in particular are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets. ETFs that target a small universe of securities, such as a specific region or market sector, are generally subject to greater market volatility, as well as to the specific risks associated with that sector, region, or other focus. ETFs that use derivatives, leverage, or complex investment strategies are subject to additional risks. Precious Metal ETFs (e.g., Gold, Silver, or Palladium Bullion backed “electronic shares” not physical metal) specifically may be negatively impacted by several unique factors, among them (1) large sales by the official sector which own a significant portion of aggregate world holdings in gold and other precious metals, (2) a significant increase in hedging activities by producers of gold or other precious metals, (3) a significant change in the attitude of speculators and investors. The return of an index ETF is usually different from that of the index it tracks because of fees, expenses, and tracking error. An ETF may trade at a premium or discount to its net asset value (NAV) (or indicative value in the case of exchange-traded notes). The degree of liquidity can vary significantly from one ETF to another and losses may be magnified if no liquid market exists for the ETF’s shares when attempting to sell them. Each ETF has a unique risk profile, detailed in its prospectus, offering circular, or similar material, which should be considered carefully when making investment decisions.

Real estate funds (including REITs) face several kinds of risk that are inherent in the real estate sector, which historically has experienced significant fluctuations and cycles in performance. Revenues and cash flows may be adversely affected by: changes in local real estate market conditions due to changes in national or local economic conditions or changes in local property market characteristics; competition from other properties offering the same or similar services; changes in interest rates and in the state of the debt and equity credit markets; the ongoing need for capital improvements; changes in real estate tax rates and other operating expenses; adverse changes in governmental rules and fiscal policies; adverse changes in zoning laws; the impact of present or future environmental legislation and compliance with environmental laws.

Annuities are a retirement product for those who may have the ability to pay a premium now and want to guarantee they receive certain monthly payments or a return on investment later in the future. Annuities are contracts issued by a life insurance company designed to meet requirement or other long-term goals. An annuity is not a life insurance policy. Variable annuities are designed to be long-term investments, to meet retirement and other long-range goals. Variable annuities are not suitable for meeting short-term goals because substantial taxes and insurance company charges may apply if you withdraw your money early. Variable annuities also involve investment risks, just as mutual funds do.

Hedge funds often engage in leveraging and other speculative investment practices that may increase the risk of loss; can be highly illiquid; are not required to provide periodic pricing or valuation information to investors; May involve complex tax structures and delays in distributing important tax information; are not subject to the same regulatory requirements as mutual funds; and often charge high fees. In addition, hedge funds may invest in risky securities and engage in risky strategies.

Private equity funds carry certain risks. Capital calls will be made on short notice, and the failure to meet capital calls can result in significant adverse consequences, including but not limited to a total loss of investment.

Private placements carry a substantial risk as they are subject to less regulation than are publicly offered securities, the market to resell these assets under applicable securities laws may be illiquid, due to restrictions, and the liquidation may be taken at a substantial discount to the underlying value or result in the entire loss of the value of such assets.

Venture capital funds invest in start-up companies at an early stage of development in the interest of generating a return through an eventual realization event; the risk is high as a result of the uncertainty involved at that stage of development.

Commodities are tangible assets used to manufacture and produce goods or services. Commodity prices are affected by different risk factors, such as disease, storage capacity, supply, demand, delivery constraints and weather. Because of those risk factors, even a well-diversified investment in commodities can be uncertain.

Options are contracts to purchase a security at a given price, risking that an option may expire out of the money resulting in minimal or no value. An uncovered option is a type of options contract that is not backed by an offsetting position that would help mitigate risk. The risk for a “naked” or uncovered put is not unlimited, whereas the potential loss for an uncovered call option is limitless. Spread option positions entail buying and selling multiple options on the same underlying security, but with different strike prices or expiration dates, which helps limit the risk of other option trading strategies. Option transactions also involve risks including but not limited to economic risk, market risk, sector risk, idiosyncratic risk, political/regulatory risk, inflation (purchasing power) risk and interest rate risk.

Non-U.S. securities present certain risks such as currency fluctuation, political and economic change, social unrest, changes in government regulation, differences in accounting and the lesser degree of accurate public information available.

Past performance is not indicative of future results. Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Item 9: Disciplinary Information

A. Criminal or Civil Actions

In August 2014, a client complaint was initiated against Andrew Lawrence Zorovich based on allegations that replacement of a life policy was unsuitable. The matter is pending in Florida State Court.

B. Administrative Proceedings

There are no administrative proceedings to report.

C. Self-regulatory Organization (SRO) Proceedings

There are no self-regulatory organization proceedings to report.

Item 10: Other Financial Industry Activities and Affiliations

A. Registration as a Broker/Dealer or Broker/Dealer Representative

Neither INFINITY nor its representatives are registered as, or have pending applications to become, a broker/dealer or a representative of a broker/dealer.

B. Registration as a Futures Commission Merchant, Commodity Pool Operator, or a Commodity Trading Advisor

Neither INFINITY nor its representatives are registered as or have pending applications to become either a Futures Commission Merchant, Commodity Pool Operator, or Commodity Trading Advisor or an associated person of the foregoing entities.

C. Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests

Andrew Lawrence Zorovich is a licensed insurance agent with Infinity Largo, LLC. Infinity Largo, LLC and INFINITY are under common ownership. This activity creates a conflict of interest since there is an incentive to recommend insurance products based on commissions or other benefits received from the insurance company, rather than on the client's needs. Additionally, the offer and sale of insurance products by supervised persons of INFINITY are not made in their capacity as a fiduciary, and products are limited to only those offered by certain insurance providers. INFINITY addresses this

conflict of interest by requiring its supervised persons to act in the best interest of the client at all times, including when acting as an insurance agent. INFINITY periodically reviews recommendations by its supervised persons to assess whether they are based on an objective evaluation of each client's risk profile and investment objectives rather than on the receipt of any commissions or other benefits. INFINITY will disclose in advance how it or its supervised persons are compensated and will disclose conflicts of interest involving any advice or service provided. At no time will there be tying between business practices and/or services (a condition where a client or prospective client would be required to accept one product or service conditioned upon the selection of a second, distinctive tied product or service). No client is ever under any obligation to purchase any insurance product. Insurance products recommended by INFINITY's supervised persons may also be available from other providers on more favorable terms, and clients can purchase insurance products recommended through other unaffiliated insurance agencies.

Andrew Lawrence Zorovich is the owner and is a Tax Preparer for Infinity Accounting and Tax Services, Inc. From time to time, he may offer clients advice or products from those activities and clients should be aware that these services may involve a conflict of interest. INFINITY always acts in the best interest of the client and clients always have the right to decide whether or not to utilize the services of any INFINITY representative in such individual's outside capacities.

Parker Lee Carroll, Jeffrey James McAvaddy, Jachym Bezouska and Rachael Megan Campbell are an independent licensed insurance agent. This activity creates a conflict of interest since there is an incentive to recommend insurance products based on commissions or other benefits received from the insurance company, rather than on the client's needs. Additionally, the offer and sale of insurance products by supervised persons of INFINITY are not made in their capacity as a fiduciary, and products are limited to only those offered by certain insurance providers. INFINITY addresses this conflict of interest by requiring its supervised persons to act in the best interest of the client at all times, including when acting as an insurance agent. INFINITY periodically reviews recommendations by its supervised persons to assess whether they are based on an objective evaluation of each client's risk profile and investment objectives rather than on the receipt of any commissions or other benefits. INFINITY will disclose in advance how it or its supervised persons are compensated and will disclose conflicts of interest involving any advice or service provided. At no time will there be tying between business practices and/or services (a condition where a client or prospective client would be required to accept one product or service conditioned upon the selection of a second, distinctive tied product or service). No client is ever under any obligation to purchase any insurance product. Insurance products recommended by INFINITY's supervised persons may also be available from other providers on more favorable terms, and clients can purchase insurance products recommended through other unaffiliated insurance agencies.

Parker Lee Carroll, Jeffrey James McAvaddy, and Jachym Bezouska are Tax Preparers for Infinity Accounting and Tax Services, Inc. Rachael Megan Campbell is Director of Business Development and Operations for Infinity Accounting and Tax Services, Inc.

Olivia Marie Stevens is in Operations & Client Services for Operations for Infinity Accounting and Tax Services, Inc. From time to time, they may offer clients advice or products from those activities and clients should be aware that these services may involve a conflict of interest. INFINITY always acts in the best interest of the client and clients always have the right to decide whether or not to utilize the services of any INFINITY representative in such individual's outside capacities.

D. Selection of Other Advisers or Managers and How This Adviser is Compensated for Those Selections

INFINITY may direct clients to third-party investment advisers. INFINITY will be compensated via a fee share from the advisers to which it directs those clients. The fees shared will not exceed any limit imposed by any regulatory agency. This creates a conflict of interest in that INFINITY has an incentive to direct clients to the third-party investment advisers that provide INFINITY with a larger fee split. INFINITY will always act in the best interests of the client, including when determining which third party investment adviser to recommend to clients. INFINITY will verify that all recommended advisers are properly licensed, notice filed, or exempt in the states where INFINITY is recommending the adviser to clients.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

A. Code of Ethics

INFINITY has a written Code of Ethics that covers the following areas: Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Exempted Transactions, Prohibited Activities, Conflicts of Interest, Gifts and Entertainment, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Training and Education, Recordkeeping, Annual Review, and Sanctions. INFINITY's Code of Ethics is available free upon request to any client or prospective client.

B. Recommendations Involving Material Financial Interests

INFINITY does not recommend that clients buy or sell any security in which a related person to INFINITY or INFINITY has a material financial interest.

C. Investing Personal Money in the Same Securities as Clients

From time to time, representatives of INFINITY may buy or sell securities for themselves that they also recommend to clients. This may provide an opportunity for representatives

of INFINITY to buy or sell the same securities before or after recommending the same securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest. INFINITY will always document any transactions that could be construed as conflicts of interest and will never engage in trading that operates to the client's disadvantage when similar securities are being bought or sold.

D. Trading Securities At/Around the Same Time as Clients' Securities

From time to time, representatives of INFINITY may buy or sell securities for themselves at or around the same time as clients. This may provide an opportunity for representatives of INFINITY to buy or sell securities before or after recommending securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest; however, INFINITY will never engage in trading that operates to the client's disadvantage if representatives of INFINITY buy or sell securities at or around the same time as clients.

Item 12: Brokerage Practices

A. Factors Used to Select Custodians and/or Broker/Dealers

Custodians/broker-dealers will be recommended based on INFINITY's duty to seek "best execution," which is the obligation to seek execution of securities transactions for a client on the most favorable terms for the client under the circumstances. Clients will not necessarily pay the lowest commission or commission equivalent, and INFINITY may also consider the market expertise and research access provided by the broker-dealer/custodian, including but not limited to access to written research, oral communication with analysts, admittance to research conferences and other resources provided by the brokers that may aid in INFINITY's research efforts. INFINITY will never charge a premium or commission on transactions, beyond the actual cost imposed by the broker-dealer/custodian.

INFINITY will require clients to use Schwab Institutional, a division of Charles Schwab & Co., Inc., AXOS Clearing LLC, (CRD# 117176) and Fidelity Brokerage Services LLC, (CRD# 7784).

1. Research and Other Soft-Dollar Benefits

While INFINITY has no formal soft dollars program in which soft dollars are used to pay for third party services, INFINITY may receive research, products, or other services from custodians and broker-dealers in connection with client securities transactions ("soft dollar benefits"). INFINITY may enter into soft-dollar arrangements consistent with (and not outside of) the safe harbor contained in Section

28(e) of the Securities Exchange Act of 1934, as amended. There can be no assurance that any particular client will benefit from soft dollar research, whether or not the client's transactions paid for it, and INFINITY does not seek to allocate benefits to client accounts proportionate to any soft dollar credits generated by the accounts. INFINITY benefits by not having to produce or pay for the research, products or services, and INFINITY will have an incentive to recommend a broker-dealer based on receiving research or services. Clients should be aware that INFINITY's acceptance of soft dollar benefits may result in higher commissions charged to the client.

2. Brokerage for Client Referrals

INFINITY receives no referrals from a broker-dealer or third party in exchange for using that broker-dealer or third party.

3. Clients Directing Which Broker/Dealer/Custodian to Use

INFINITY will require clients to use a specific broker-dealer to execute transactions. Not all advisers require clients to use a particular broker-dealer.

B. Aggregating (Block) Trading for Multiple Client Accounts

If INFINITY buys or sells the same securities on behalf of more than one client, then it may (but would be under no obligation to) aggregate or bunch such securities in a single transaction for multiple clients in order to seek more favorable prices, lower brokerage commissions, or more efficient execution. In such case, INFINITY would place an aggregate order with the broker on behalf of all such clients in order to ensure fairness for all clients; provided, however, that trades would be reviewed periodically to ensure that accounts are not systematically disadvantaged by this policy. INFINITY would determine the appropriate number of shares and select the appropriate brokers consistent with its duty to seek best execution.

Item 13: Review of Accounts

A. Frequency and Nature of Periodic Reviews and Who Makes Those Reviews

All client accounts for INFINITY's advisory services provided on an ongoing basis are reviewed at least annually by Andrew Zorovich, Managing Director and Chief Compliance Officer, with regard to clients' respective investment policies and risk tolerance levels. All accounts at INFINITY are assigned to this reviewer.

All financial planning accounts are reviewed upon financial plan creation and plan delivery by Andrew Zorovich, Managing Director and Chief Compliance Officer. Financial planning clients are provided a one-time financial plan concerning their

financial situation. After the presentation of the plan, there are no further reports. Clients may request additional plans or reports for a fee.

B. Factors That Will Trigger a Non-Periodic Review of Client Accounts

Reviews may be triggered by material market, economic or political events, or by changes in client's financial situations (such as retirement, termination of employment, physical move, or inheritance).

With respect to financial plans, INFINITY's services will generally conclude upon delivery of the financial plan.

C. Content and Frequency of Regular Reports Provided to Clients

Each client of INFINITY's advisory services provided on an ongoing basis will receive a quarterly report detailing the client's account, including assets held, asset value, and calculation of fees. This written report will come from the custodian. INFINITY will also provide at least quarterly a separate written statement to the client.

Each financial planning client will receive the financial plan upon completion.

Item 14: Client Referrals and Other Compensation

A. Economic Benefits Provided by Third Parties for Advice Rendered to Clients (Includes Sales Awards or Other Prizes)

Other than soft dollar benefits as described in Item 12 above, INFINITY does not receive any economic benefit, directly or indirectly from any third party for advice rendered to INFINITY's clients.

With respect to Schwab, INFINITY receives access to Schwab's institutional trading and custody services, which are typically not available to Schwab retail investors. These services generally are available to independent investment advisers on an unsolicited basis, at no charge to them so long as a total of at least \$10 million of the adviser's clients' assets are maintained in accounts at Schwab Advisor Services. Schwab's services include brokerage services that are related to the execution of securities transactions, custody, research, including that in the form of advice, analyses and reports, and access to mutual funds and other investments that are otherwise generally available only to institutional investors or would require a significantly higher minimum initial investment. For INFINITY client accounts maintained in its custody, Schwab generally does not charge separately for custody services but is compensated by account holders through commissions or other transaction-related or asset-based fees for securities trades that are executed through Schwab or that settle into Schwab accounts.

Schwab also makes available to INFINITY other products and services that benefit INFINITY but may not benefit its clients' accounts. These benefits may include national, regional or INFINITY specific educational events organized and/or sponsored by Schwab Advisor Services. Other potential benefits may include occasional business entertainment of personnel of INFINITY by Schwab Advisor Services personnel, including meals, invitations to sporting events, including golf tournaments, and other forms of entertainment, some of which may accompany educational opportunities. Other of these products and services assist INFINITY in managing and administering clients' accounts. These include software and other technology (and related technological training) that provide access to client account data (such as trade confirmations and account statements), facilitate trade execution (and allocation of aggregated trade orders for multiple client accounts, if applicable), provide research, pricing information and other market data, facilitate payment of INFINITY's fees from its clients' accounts (if applicable), and assist with back-office training and support functions, recordkeeping and client reporting. Many of these services generally may be used to service all or some substantial number of INFINITY's accounts. Schwab Advisor Services also makes available to INFINITY other services intended to help INFINITY manage and further develop its business enterprise. These services may include professional compliance, legal and business consulting, publications and conferences on practice management, information technology, business succession, regulatory compliance, employee benefits providers, human capital consultants, insurance and marketing. In addition, Schwab may make available, arrange and/or pay vendors for these types of services rendered to INFINITY by independent third parties. Schwab Advisor Services may discount or waive fees it would otherwise charge for some of these services or pay all or a part of the fees of a third-party providing these services to INFINITY. INFINITY is independently owned and operated and not affiliated with Schwab.

B. Compensation to Non - Advisory Personnel for Client Referrals

INFINITY does not directly or indirectly compensate any person who is not advisory personnel for client referrals.

Item 15: Custody

When advisory fees are deducted directly from client accounts at client's custodian, INFINITY will be deemed to have limited custody of client's assets and must have written authorization from the client to do so. Clients will receive all account statements and billing invoices that are required in each jurisdiction, and they should carefully review those statements for accuracy.

Item 16: Investment Discretion

INFINITY does not have discretion over client accounts at any time. INFINITY operates in a discretionary capacity solely to supervise the Co-Advisors that execute trades for our clients

Item 17: Voting Client Securities (Proxy Voting)

INFINITY will not ask for, nor accept voting authority for client securities. Clients will receive proxies directly from the issuer of the security or the custodian. Clients should direct all proxy questions to the issuer of the security.

Item 18: Financial Information

A. Balance Sheet

INFINITY neither requires nor solicits prepayment of more than \$500 in fees per client, six months or more in advance, and therefore is not required to include a balance sheet with this brochure.

B. Financial Conditions Reasonably Likely to Impair Ability to Meet Contractual Commitments to Clients

Neither INFINITY nor its management has any financial condition that is likely to reasonably impair INFINITY's ability to meet contractual commitments to clients.

C. Bankruptcy Petitions in Previous Ten Years

INFINITY has not been the subject of a bankruptcy petition in the last ten years.

Item 19: Requirements For State Registered Advisers

A. Principal Executive Officers and Management Persons; Their Formal Education and Business Background

The education and business backgrounds of INFINITY's current management persons, Andrew Lawrence Zorovich, Parker Lee Carroll, and Jeffrey James McAvaddy, can be found on the Form ADV Part 2B brochure supplements for those individuals.

B. Other Businesses in Which This Advisory Firm or its Personnel are Engaged and Time Spent on Those (If Any)

Other business activities for each relevant individual can be found on the Form ADV Part 2B brochure supplement for each such individual.

C. Calculation of Performance-Based Fees and Degree of Risk to Clients

INFINITY does not accept performance-based fees or other fees based on a share of capital gains on or capital appreciation of the assets of a client.

D. Material Disciplinary Disclosures for Management Persons of this Firm

There are no civil, self-regulatory organization, or arbitration proceedings to report under this section.

E. Material Relationships That Management Persons Have With Issuers of Securities (If Any)

Neither INFINITY, nor its management persons, has any relationship or arrangement with issuers of securities.
